### **DETAILED ACTION**

1. The Response to Restriction requirement filed 10/8/02 (paper number 5) has been entered.

#### ***Election/Restriction***

2. Applicant's election of Group I, Claims 1-3, in Paper No. 5 (10/8/02), is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)). Claims 4-25 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

The requirement is still deemed proper and is therefore made FINAL.

#### ***Sequence Rules Compliance***

This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 for the reason(s) set forth on the attached Notice To Comply With Requirements For Patent Applications Containing Nucleotide Sequence And/Or Amino Acid Sequence Disclosures.

Applicant must comply with the sequence rules, 37 CFR 1.821 - 1.825 within the statutory period set for response to this office action. Failure to comply with these requirements will result in ABANDONMENT of the application under 37 CFR 1.821(g). Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37

Art Unit: 1646

CFR 1.136(a). In no case may an applicant extend the period for response beyond the SIX MONTH statutory period. Direct the response to the undersigned. Applicant is requested to return a copy of the attached Notice to Comply with the response.

5 **Claim Rejection, 35 U.S.C. 112, second paragraph**

4. Claims 1-3 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

10 Claim 1 is indefinite because the name "interleukin-22 receptor molecule" and "interleukin-20 receptor  $\beta$  molecule" has not been defined in the claims and specification so as to allow the metes and bounds of the claims to be determined. The structure associated with polypeptide names "interleukin-22 receptor molecule" and "interleukin-20 receptor  $\beta$  molecule" are not disclosed so as to allow the metes and bounds of the claim to be determined. Similarly other proteins may have different names, but encompass the same protein. The name is subject to change. Therefore, without a clear disclosure of the structure and associated function of the "interleukin-22 receptor molecule" and "interleukin-20 receptor  $\beta$  molecule" the metes and bounds of the claim cannot be determined. Further the ambiguity in the names is highlighted by the specification, which discloses, page 2, first paragraph, that DIRS1 is a name suggested for IL-20R $\beta$ , it is not clear if DIRS1 is an art accepted term for IL-20R $\beta$ , or merely a suggestion that it may be the same. Further it is not clear if DIRS1, "interleukin-20 receptor  $\beta$  molecule" and IL-

20R $\beta$  all refer to the same structure. Further confusion about the naming of compounds is shown by the following example. The specification discloses, "The IL-22 molecule was originally described as an IL-9 inducible gene, and was referred to as "IL-TIF", for "IL-10 related T cell derived inducible factor."", see page 2, lines 9-12. Ludwig Institute for Cancer research (WO 02/10393 A2, see Ref A), when referring to their invention, state "These molecules have been described as "T cell Derived Inducible Factors" or "TIFs"; however, as of now, they are known as "interleukin-21" or IL-21", as well as IL-TIF.'" Therefore from the two examples shown, it may be argued, since IL-TIF is the same as IL-21 and IL-22, then IL-21 is the same as IL-22. IL-21 and IL-22 are not the same. Therefore the names and the interpretation of the names change. It is suggested "interleukin-22 receptor molecule" and "interleukin-20 receptor  $\beta$  molecule" be identified by SEQ ID NO: to overcome the rejection.

Claims 2 and 3 are rejected for depending on an indefinite base claim and fail to resolve the issues raised above.

5. No claim is allowed.
